Notes :

- (1) Composite test has been performed and the result is calculated using the minimum sample weight.
- (2) The test result is over the recommended safety limit as specified in GB/T 22048-2015 (60% of the regulatory limit). As the test result is based on the composite sample and is fall into an uncertain range, where "Pass" cannot be truly define, It is highly recommended to conduct individual test for the exact content of Phthalate in each individual component.
